 USA

Mike Morse Law Firm

OVERVIEW

Mike Morse Law Firm, one of the US's leading personal injury firms, completed a full security transformation with Verkada in under 90 days by replacing fragmented systems with one integrated platform combining access control, video security, and workplace management.

With mobile unlock and BLE credentials, employees access all office locations without physical keycards. Real-time alerts for tailgating, door events, and visitors allow faster incident response, and the firm uses Occupancy Trends to analyze space usage for future plans.

"On one floor, we have over 30 doors. In some areas, if employees are not carrying their badges, they can find themselves trapped between doors and not get to where they need to be. Having Verkada allows them to travel securely through any office without a second thought."

John Georgatos | Chief Information Officer

The infographic features a background image of the Mike Morse Law Firm building at night. The building has a sign that reads "mike morse law firm" and "855-MIKE-WINS". Several flags are flying in front of the building. The text is overlaid on the image in white and yellow.

KEY METRICS

<90 days
To achieve a fully cloud-managed security transformation

1
Centralized system across offices

200+
Employees provisioned automatically via SCIM
